DATE MAILED: 12/07/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/933,067

Applicant(s)

BRANDSTETTER ET AL.

Examiner

Corbett B. Coburn

Art Unit

3714

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM
THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 July 2004.
2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-18 is/are pending in the application.
4a) Of the above claim(s) _____ is/are withdrawn from consideration.
5) ☐ Claim(s) _____ is/are allowed.
6) ☒ Claim(s) 1-18 is/are rejected.
7) ☐ Claim(s) _____ is/are objected to.
8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 1 Jul 04
4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
5) ☐ Notice of Informal Patent Application (PTO-152)
6) ☐ Other: _____

DETAILED ACTION***Claim Objections***

1. Claim 10 is objected to because of the following informalities: Claim 10 requires the dispensing units to be linked. Linked to what? While Examiner has always assumed that this means that the gaming machines were linked (thus linking the dispensing units), this no longer appears to be a reasonable interpretation. Claim 10 does not mention linked gaming machine and it would be reading too much into the claim to assume such a network. Nor does the claim indicate that there is a network of dispensing units. Also, the phrase, "that combination of devices" indicates a closer connection between devices than a network. In fact the language indicates that the combination becomes essentially one device. This is what Applicant describes in the specification when discussing how the dispenser may be mounted within the slot machine cabinet. Therefore, Examiner will assume that the claim means that the dispensing units are linked to the gaming machine. Appropriate correction is required if Applicant wishes another interpretation.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-6, 9, 10, 12, & 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okuniewicz (US Patent Number 6,585,589) in view of Quinn. (US Patent Number 3,688,276).

Art Unit: 3714

Claim 1: Okuniewicz teaches device for paying out a bonus (Col 1, 43-46) to a player playing a gaming machine. (Fig 1) There is a gaming machine (Slot Machine). There is a dispensing unit (Lottery Terminal). Since Okuniewicz teaches that the dispensing unit may dispense a ticket when a present amount of coins are inserted (Col 3, 46-53), there must be a numeric counter for counting the number of coins placed in said gaming machine that counts coins until a ticket is generated. Okuniewicz does not teach visually displaying to the player the number of coins needed to generate a ticket or the number of coins inserted by the player. Nor does Okuniewicz teach resetting the counted coins to zero once a ticket is generated. These are common functions on virtually any modern vending machine.

Quinn, which is also a lottery ticket dispenser, teaches visually displaying to the player the number of coins needed to generate a ticket and the number of coins inserted by the player as well as resetting the counted coins to zero once a ticket is generated. (Fig 1) Such a visible meter allows the player to know how much money he must insert and how much money he has inserted. Clearing the counter lets the player know that if he wants another ticket, he has to put in more money. These features add to user convenience and are, as previously pointed out, extremely well known. It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified Okuniewicz in view of Quinn to visually display to the player the number of coins needed to generate a ticket and the number of coins inserted by the player as well as to reset the counted coins to zero once a ticket is generated in order to add to player convenience.

Art Unit: 3714

Claims 2-4: Okuniewicz teaches that the dispensing unit may be a retrofit unit for a slot machine (Col 3, 1-4). Okuniewicz teaches that the dispensing unit could be attached to the gaming machine externally (i.e., side-mounted) or mounted internally. (Col 4, 63-66)

Claim 5: The gaming machine may include video poker machines (Col 3, 36-42). Video bingo games and video keno games are disclosed as equivalents.

Claim 6: The dispensing unit is a self-contained unit that does not affect play or outcome of said gaming machine. (Col 4, 35-43)

Claims 9, 14: Okuniewicz dispenses lottery tickets. (Abstract)

Claim 10: Okuniewicz teaches that the dispensing units are linked (to the gaming machine) so that the combination of devices (i.e., the slot machine/lottery terminal combination) has to have a certain number of coins inserted before a ticket is dispensed. (Col 3, 51)

Claims 12, 17: Claim 12 is a combination of claims 1 & 5. Claim 17 is a subset of claim 1.

Claim 15: Okuniewicz teaches holding a drawing to determine a winner of said ticket.

Claim 16: Okuniewicz teaches the lottery ticket may be for the Big Game. In the Big Game, a bonus prize is generated from a percentage of total coins placed into all participating gaming machines (i.e., a percentage of money used to buy game tickets).

4. Claims 7, 8, 11, 13 & 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okuniewicz and Quinn as applied to claim 1, 12 above, and further in view of Castellano et al. (US Patent Number 5,477,952).

Claims 7, 13: Okuniewicz and Quinn teach the invention substantially as claimed. Both

contain coin counters, but do not give details of the operation thereof. Okuniewicz bonuses a player based on number of coins played (Col 3, 51) but does not teach that the numeric counter counts coin pulses off of the gaming machine's hard meter. Castellano teaches the method of operation of the coin counters. Castellano teaches that the numeric counter (12) counts coin pulses off of the gaming machine's hard meter (52). It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified Okuniewicz and Quinn in view of Castellano to have the numeric counter count coin pulses off of the gaming machine's hard meter in order to carry out Okuniewicz and Quinn's suggestion to count the coins entered by the player.

Claim 8: Okuniewicz and Quinn teach the invention substantially as claimed. Neither specifically discloses that the numeric counter can count various coin denominations. Castellano specifically teaches discloses that the numeric counter can count various coin denominations. (Fig 1, 21-24) Allowing players to use more than one denomination makes it convenient for the player to put more money in the slot machine. This increases profits. It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified Okuniewicz and Quinn in view of Castellano to have the numeric counter can count various coin denominations in order to make it convenient for the player to put more money in the slot machine.

Claims 11, 18: Okuniewicz teaches that the benefit of the device is the ability to change the criteria for generating a ticket. (Col 3, 1-9) The LIB is a remote unit (i.e., a separate module) for changing the number of coins necessary to generate said ticket.

Art Unit: 3714

Response to Arguments

5. Applicant's arguments with respect to claims 1-18 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Corbett B. Coburn whose telephone number is (571) 272-4447. The examiner can normally be reached on 8-5:30, Monday-Friday, alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Derris Banks can be reached on (571) 272-4419. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
